## **Audemat-Aztec participates to the first Digital forum in Dominican Republic** *Indotel invites Audemat-Aztec to make presentation on HD Monitoring*

Miami, FL - Wednesday, June 20, 2007 - Audemat-Aztec (<http://www.audemat-aztec.com>) announced today that they were invited to attend the first international digital forum in the Dominican Republic organized by the Instituto Dominicano de las Telecomunicaciones (Indotel), June 13 and 14<sup>th</sup> 2007. The conference concentrated on Digital Radio applications to be implemented in the Dominican Republic. Over 100 people were present including broadcasters from the Caribbean and Latin America. Francisco Hernandez, newly appointed Sales manager for Latin America for Audemat-Aztec, attended. At the conference, Hernandez made a presentation on HD monitoring and a live demonstration of the GOLDENEAGLE HD (<http://www.goldeneagle-hd.com/>)

### **About Goldeneagle HD:**

The GOLDENEAGLE HD AM-FM is a HD receiver designed as a smart modulation monitor with optional spectrum analyzer/digital demodulator and transmitter remote control capabilities. The GOLDENEAGLE HD AM-FM can be installed at the studio, at the transmitter site or in any reception area. The standard version includes an embedded web server and a software interface for remote control via TCP/IP.

The GOLDENEAGLE HD AM-FM monitors automatically, in real time, the quality and continuity of several\* FM and/or AM analog and HD programs and notifies the relevant personnel of any problem by sending an alarm. The GOLDENEAGLE HD AM-FM offers innovative functions such as a spectrum analyzer; audio streaming and recording, automatic market monitoring, measurement analysis and storage as well as transmitter optional remote control.

### **3 versions are available:**

- GOLDENEAGLE HD FM: includes 1 HD and 1 FM/RDS analog receivers.
- GOLDENEAGLE HD AM: includes 1 HD/AM receiver
- GOLDENEAGLE HD FM/AM: includes 1 HD/AM and 1 FM/RDS analog receivers.

\* The receiver automatically scans and monitors the pre-configured stations. We recommend the user configures their own stations in the monitoring cycle and use the scanning or real-time measurements feature to monitor the other stations in the market as needed.

**With over 450 units sold - GOLDENEAGLE HD has proven to be the Broadcasters' #1 choice for precision HD monitoring.**
