February 15, 2005

## **Audemat-Aztec Collaborates with Clear Channel Radio to Customize HD Radio Monitoring Units**

*GOLDENEAGLE HD Monitor FM & AM suits the needs of Clear Channel*

Miami, FL Feb, 15th 2005, Audemat-Aztec (<http://www.audemat-aztec.com>) announced today that Clear Channel placed an order for 49 GOLDENEAGLE HD FM Modulation Monitors and 14 GOLDENEAGLE HD AM Modulation Monitors. Audemat-Aztec monitors were specifically designed and customized to meet the needs of Clear Channel.

“Clear Channel Radio chose Audemat-Aztec to supply our HD Radio Modulation Monitors because we have had great success with the Audemat-Aztec RBDS Encoders and other Audemat-Aztec products, and because these monitors included a robust feature set at an excellent price”, states Steve Davis, Senior Vice President, Engineering & Capital Management for Clear Channel Radio. “Of significant value was the ability to customize the units, adding a Spectrum Analyzer display at very low incremental cost, frequency agility, and ability to monitor multiple audio streams” adds Davis.

“Our mission is to listen to the market needs and design innovative products at the best price. Audemat-Aztec is thrilled to be part of the HD transition. I want to thank personally Jeff Littlejohn and Steve Davis for their trust in our company.” Said Christophe Poulain, Vice President, Business Development for Audemat-Aztec.

### **GOLDENEAGLE HD FM/AM MONITOR**

GOLDENEAGLE HD is a monitoring unit dedicated to the permanent monitoring of the quality and continuity of HD and FM/AM signals as well as PAD and RBDS data. An embedded spectrum analyzer is available as an option to monitor power of the sidebands and other parameters. GOLDENEAGLE HD has an embedded web server and SMTP server for alarms notification as well as a touchpad screen on the front panel. Installed on the transmitting site, it can also be used as a remote control unit by adding up to, depending of configuration, 16 digital inputs, 16 metering channels and 16 relays outputs. GOLDENEAGLE HD can monitor several stations on one market.
